UNIQUE ARTISTIC COLLABORATION LAUNCHES WEBSITE AND PROTOTYPE ALBUM

AUGUST 22, 2007 (AVENEL, NEW JERSEY) – The Very Us Artists (VUA), a collection of songwriters, composers and visual artists seeking to widen their exposure and challenge their abilities, announces the launch of their website and completion of a prototype album, *Opus Cipher: The Prototype*, available Tuesday August 28, 2007, freely available on the website.

The Very Us Artists is constantly seeking composers, artists, and fellow dreamers to join an artistic adventure that will generate unique, inventive music and art that reaches beyond the bounds of conventional album production. VUA will be producing a series of bimonthly compilation albums of original music and a work of art, promoted and distributed through TownHall Records.

In essence, Very Us Artists albums are indeed “various artists” albums, with the difference being that they're not mere compilations of previously existing music but collections of music and art written specifically for inclusion on a specific Very Us Artists album. With each release, the line-up of musicians and composers varies from song to song, each album centered around a common, yet uncommon, concept or theme.

Just as each album's musical line-up is different, so is its cover artist, whose art also reflects the theme of the particular album. Each one is released as digital downloads and as a physical CD in a distinctively designed jacket. This packaging is intended to be more than just the housing for the CD. It is, in fact, a work of art itself.

Complimentary press copies are available upon request. For further information, please visit www.veryusartists.com or contact Kate Baldwin at (917)597-3974.
